

VISUAL ARTS INSTRUCTOR

MIMI KRALL

I started creating with polymer clay in 1994 when my daughter started first grade. I had loved clay since I was young and needed to feed my creativity. I found that polymer clay led me into discovering the joy of painting, using alcohol ink and pottery clay. These are just a few of the mediums I create with today. I have sold art at craft shows, art fairs and have created custom work.

Since 2007 I have worked as a Visual Arts Instructor at the Hanover Township Senior Center. I am able to share my love of art in a fun social setting and show more skeptical students who attend classes that they do have a flair for art, they just didn't have the time to discover it until now.
